150 years of Laryngectomy
- past, present and future -

Vienna, 1-2 December 2023

BILLROTHHAUS

Dear colleagues,

December 2023 will mark the 150th anniversary of the first total laryngectomy performed by Theodor Billroth on 31 Dec 1873.

To celebrate such a milestone in medical history, on 1-2 December we will have a symposium in the historic rooms of the Billrothhaus in Vienna, with a distinguished international faculty of head and neck surgeons and laryngologists coming from all over the world, titled:

“150 years of laryngectomy: past, present, and future”

We, the Austrian head and neck society together with the European laryngological society, are pleased to invite you to Vienna to commemorate together this unique occasion.

Best regards,

Dietmar Thurnher & Cesare Piazza
